

The 1st Decentralized Audit Yield Farm

Built on:

Current scenario of the DeFi sector

According to a report by CipherTrace, a crypto intelligence company on May 13th 2021

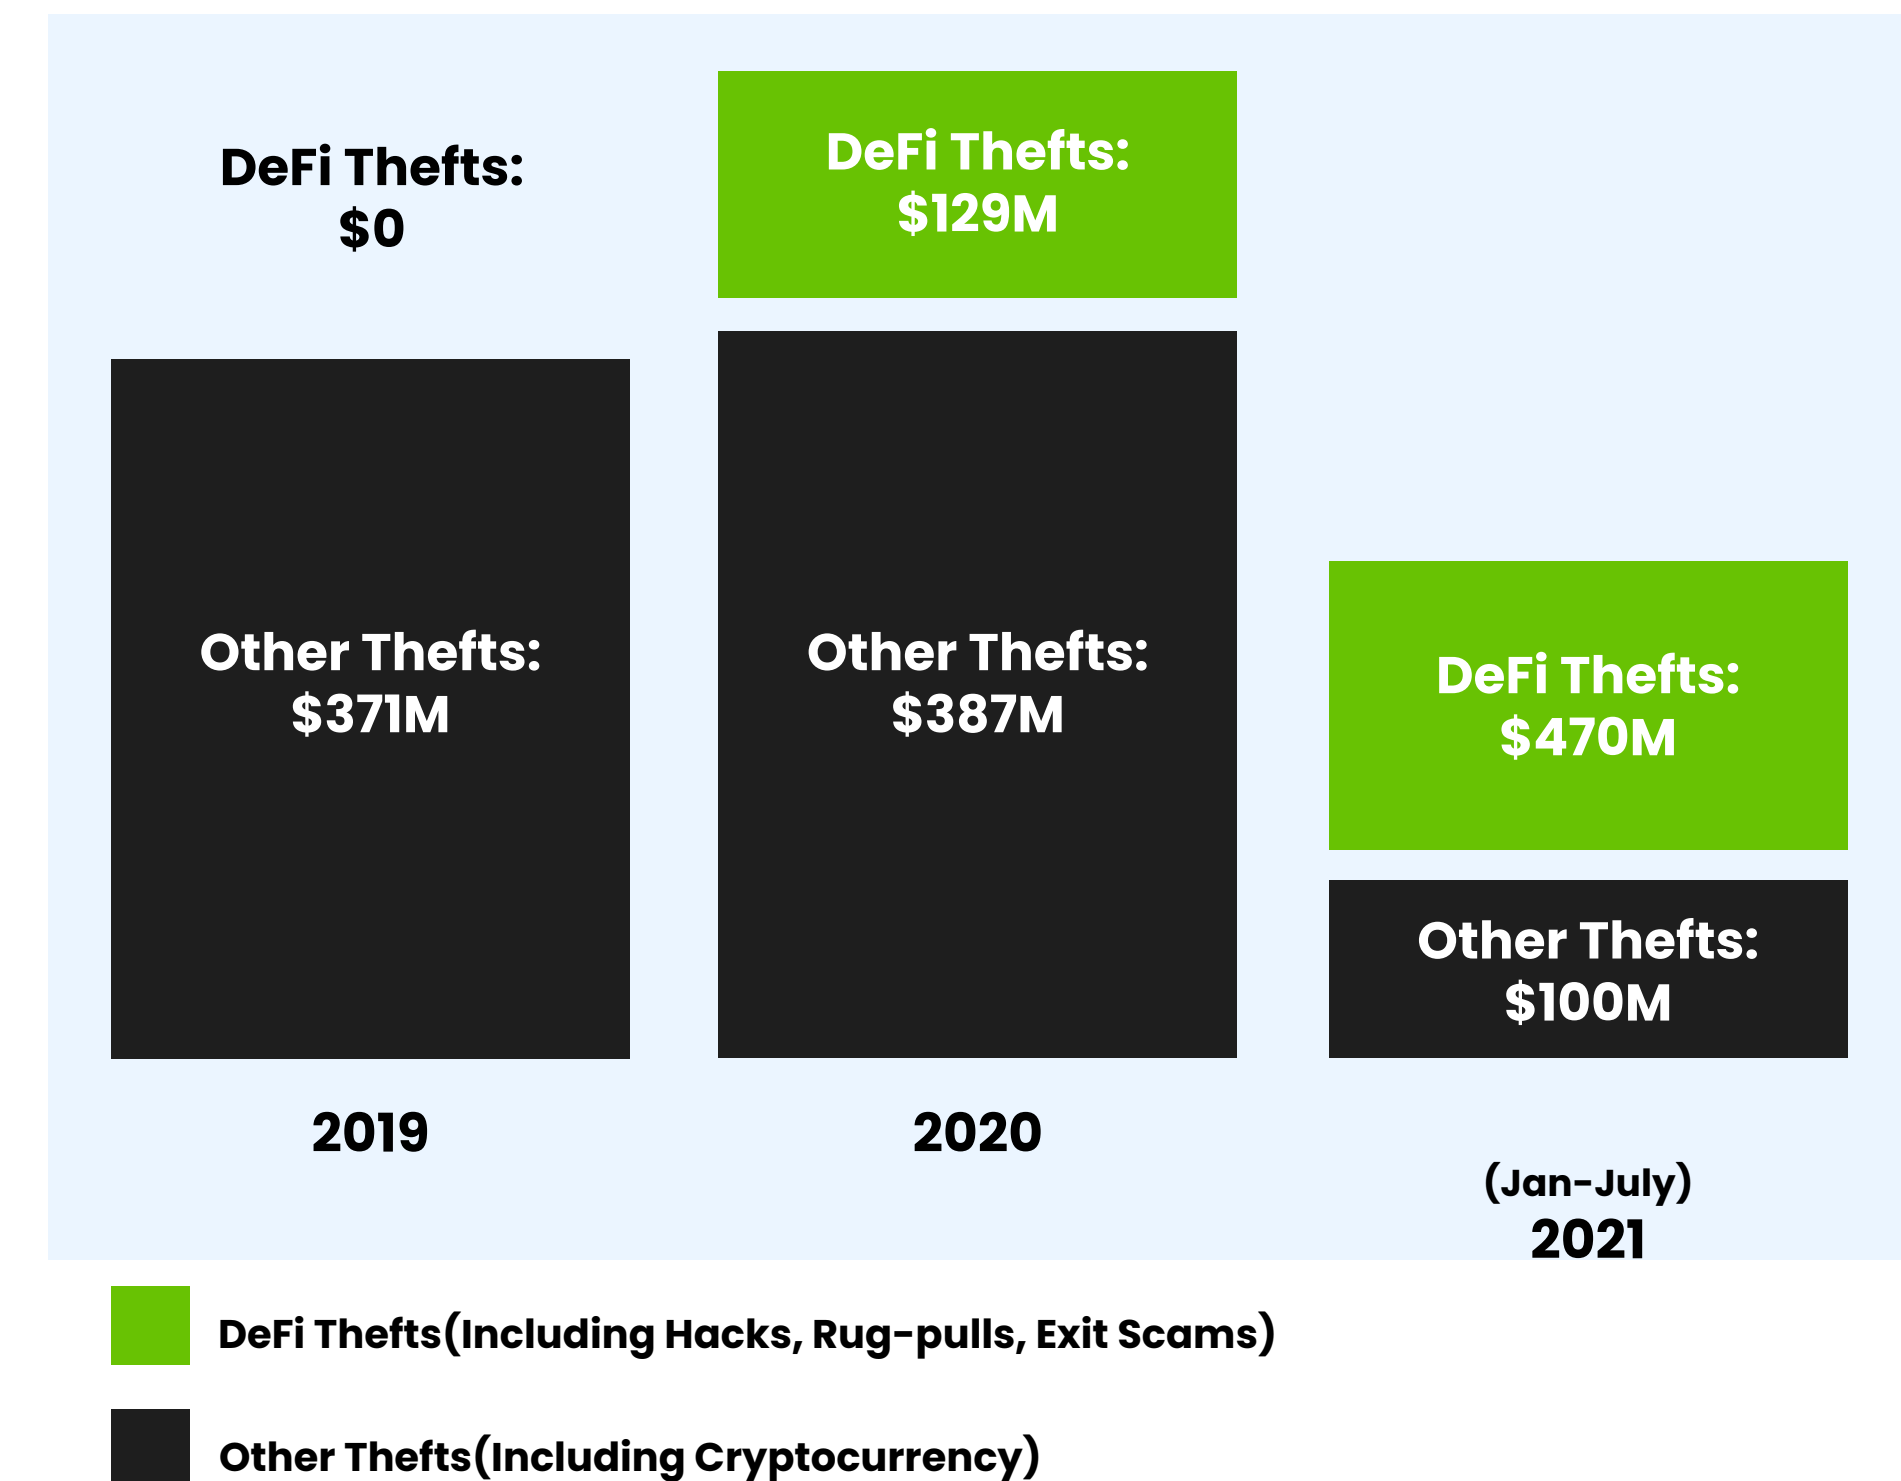

“crime in the booming DeFi space hit an all-time high.”

Nearly 99% of major fraud and misappropriations volume stemmed from DeFi protocols performing rug pulls and exit scams

There’s no doubt that this percentage will continue to grow in 2021 and the years to come; considering the number of incidents that have already transpired this year.

The losses incurred every year in the DeFi space amount to nearly a billion. After seeing people loose millions and even their life savings from fraud is disheartening and would tarnish the name of the DeFi sector when the true potential of this space is limitless and it deters even the genuine projects .

DeFi-related hacks and scams already make up more than 60% of major crime rate volume in 2021

We present to you the first ever Decentralized Audit Yield Farm—**DYOR Audit**.

- ⊕ We offer cost effective audits.
- ⊕ Payment can be made through staking of the **\$DYOR Token**.
- ⊕ The status of the audits are updated on our website for all to see.
- ⊕ The industry security standards are made transparent for all.
- ⊕ We also offer Bounty initiatives to members of the community who provide information about bad actors and illicit behaviour through the **\$DYOR Token**.

How are we different from other Audit firms?

01. A dynamic community over the reliance of a so called trusted name.

02. Evolving and keeping up to date with the latest security standards.

03. A transparent audit system that prioritizes end user safety.

04. Effective communication system between the auditors and investors.

How is our Audit performed?

Phase 1

Our well versed security researchers and smart contract developers perform comprehensive audits as given below.

A line by line manual check by the clinical analysis.

Analysis by the security wing of the team itself.

Multi-layered vulnerability scans.

An incentivized community check.

The **DYOR PURGE PROTOCOL.**

How is our Audit performed?

Phase 2

We then move into rectifying any discrepancies found in the initial report.

RESULTS:

We provide the recommendations for code changes to our prospective clients.

ACCOUNTABILITY:

The changes recommended must be done and the vulnerabilities found are to be solved after which, a final report be issued.

ACTION:

A time limit will be given to make the necessary changes. Failure of which, will lead to the reports being uploaded without the changes.

Note:

01.

We also provide KYC Verification as a value added service.

02.

The issued final report will be comprehensive and easy to understand for even the average investor.

The Purge Protocol

The Purge Protocol is the heart and soul of DYOR Audit. Our core Values of the purge protocol are to clean up the DeFi space and help the space reach new heights by providing services to the genuine projects while purging the bad actors.

We acknowledge that this is not an easy task and the community itself has the potential to save itself from scammers. So together we can create a DeFi space that is safe and welcoming to everyone. And thanks to **\$DYOR Token**, that would run the entire show.

Services other than Audits

Smart Contract Creation & Deployment

We create Smart Contracts for any type of DApp, like designing DEXes (Decentralized Exchanges), NFTs, games, tokens, pre-sales and deployment of Smart Contracts or Custom Functions that you may require.

DEX Design & Development

Building DEXes (Decentralized Exchanges) is one of our specialities. We build unique and safe DEXes that stand apart from other clones.

UI/UX Architecture & Inception

Our UI/UX designs are tailor made to each client, promising to make a new experience with every project so that no two projects look the same.

Custom Blockchain Solutions

We can build any project onto any chain or even Multi-Chain deployments as per your requirements.

Launch Your Project on **DYOR** Now!

If you have a disruptive idea and are looking to raise some serious capital via an ICO, IDO or Pre-Sale but don't possess the technical know-how, then don't you worry, because DYOR Audit is here to help you!

Presenting the **DYOR LaunchPad** specifically designed to help you raise funds with our Multi-Chain ecosystem that will help boost your project by raising capital across Ethereum, Binance Smart Chain and Polygon on one highly secured platform!

It gets better, as we even offer the additional service of creating your custom smart contracts from scratch for a minor fee. But we've still left the best for last. To list your ICO, IDO or Pre-Sale on the DYOR LaunchPad simply fill our LaunchPad Application Form and after getting approved post submission- participate in the \$DYOR Token Pre-Sale to launch your next big Crypto or De-Fi idea while also acquiring the valuable \$DYOR token asset! **#WinWin**

Why choose us?

Multi-Chain LaunchPad

Raise the capital on the Blockchain of your choice with our seamless Multi-Chain LaunchPad ecosystem across Polygon, Ethereum and Binance.

Highly Secure Platform

Security is always top priority especially when raising funds on the decentralized web and that's something we take very seriously with multiple security features deployed across our LaunchPad.

Audited Smart Contracts

All Smart Contracts used to interact on our LaunchPad platform are thoroughly audited and tested by the DYOR Audit team prior to approval to keep you and your investors safe at all times!

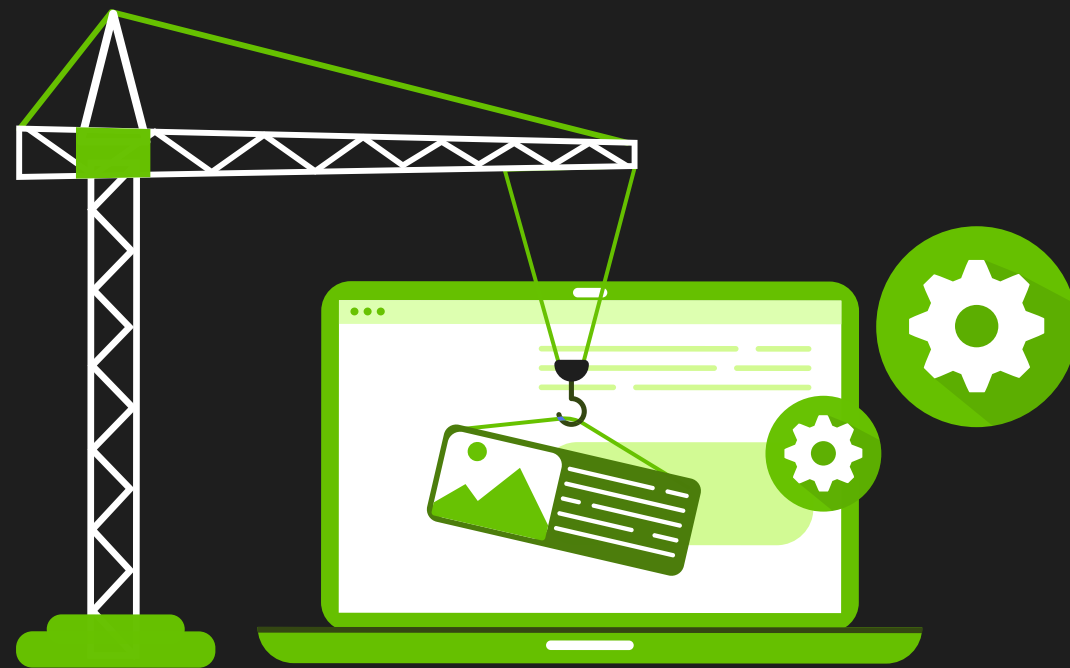

Dedicated Support

The DYOR Audit Team prides itself in providing dedicated support via E-mail, Telegram and across all our Social Channels to resolve any potential concerns.

Future Scope

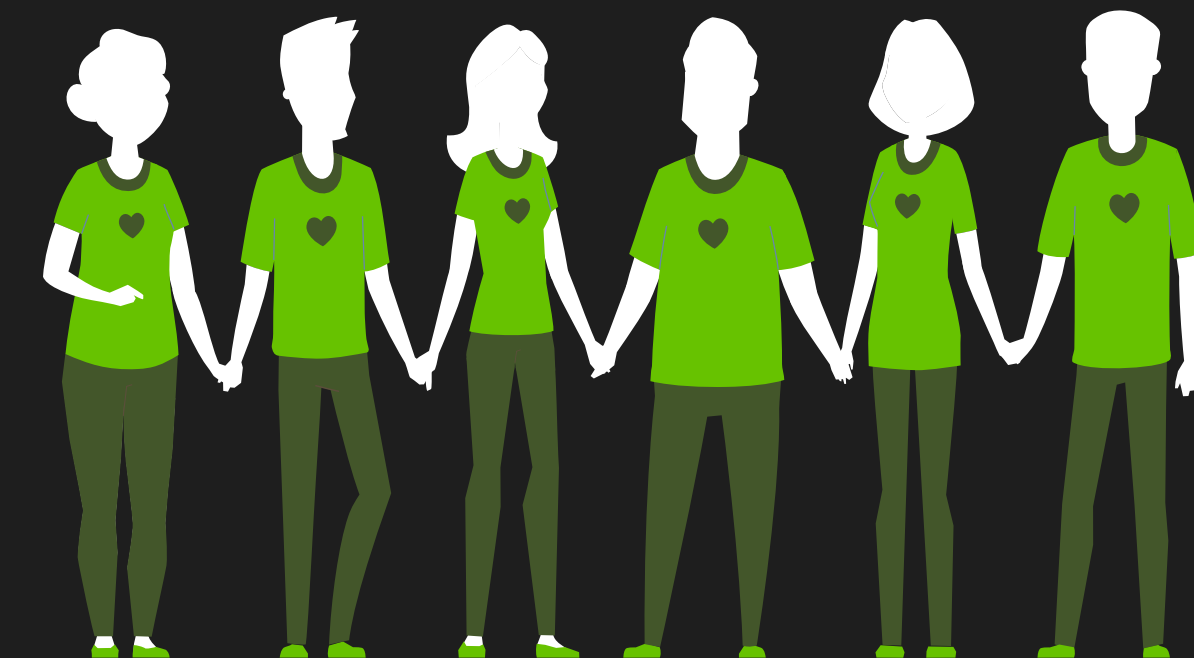

DApp Builder

A platform that allows users to build their own Decentralized Exchanges and Apps with a drag and drop method from pre-created templates.

The **\$DYOR Token** will be utilized to gain access to the platform and for utilizing premium functions that will be provided.

Community Audits

As we progress on the course of cleaning the bad actors from the DeFi space, DYOR Audit would introduce a community platform that allows, good actors to join and help with audits.

Good samaritans in the space, that audit contracts and DEXes that have malicious behaviour would be incentivized **\$DYOR Token**.

DYOR Tokenomics

Token Name: **DYOR Token**

Min Deposit (Per Wallet Address): **\$100 USDT/USDC**

Ticker Symbol: **DYOR**

Max Deposit (Per Wallet Address): **\$100,000 USDT/USDC**

01. Multi-Chain Pre-Sale: **Ethereum, Binance Smart Chain & Polygon Network.**
02. Fair Launch – **No Private Sale, No Seed Round, No Investor Funds.** Public Pre-Sale via time-locked vested Smart Contracts to prevent token dump.
03. Duration of Pre-Sale: 70 days starting **October 21st, 2021** and ending **December 31st, 2021**.
04. Initial Supply (Pre-Minted): **40 Million \$DYOR Tokens** – 10 Million \$DYOR Tokens on each Blockchain.
05. Pre-Sale Price: **\$1** (Buying via USDC/USDT on MATIC vs BSC or ETH to **receive 10% bonus tokens/wallet address for first 30 days**)

DYOR Smart Contracts

Polygon Network

Ethereum Blockchain

Binance Smart Chain

\$DYOR Token Contract Address:

10%

Tokens For Listing on DEXes :

4,000,000 (To be listed at higher than Pre-Sale price – Exact price TBD)

15%

Team's Allocation :

6,000,000 (Time locked for 48 months & equal % released every 30 days starting 5 months post pre-sale, i.e. 125,000 \$DYOR Tokens released every month from 15th May, 2022)

25%

Binance Smart Chain :

10,000,000 to be allocated on Binance Smart Chain

25%

Polygon Network

10,000,000 to be allocated on Polygon Network

25%

Ethereum Blockchain

10,000,000 to be allocated on Ethereum Blockchain

75%

Public Sale Allocation :

30,000,000 (Time locked for 36 months & equal % released every 30 days starting 3 months post pre-sale, i.e. from 15th March, 2022 onwards.) **Unsold tokens to be burnt.**
